Honeywell BW Gas Alert MicroClip XL 4-Gas Detector

Product information

The Honeywell BW MicroClip XL is a portable 4-gas detector designed for personal gas monitoring in industrial environments. It simultaneously monitors oxygen (O2), hydrogen sulfide (H2S), carbon monoxide (CO) and combustible gases (LEL), providing real-time readings and audible, visual and vibrating alarms. Its compact, rechargeable design supports continuous monitoring throughout work shifts.

Best used for:

- Personal gas monitoring in industrial workplaces with potential toxic, combustible or oxygen-related atmospheric hazards.
- Work in wet, dusty or potentially explosive environments requiring portable multi-gas detection.

Product benefits:

- Simultaneous four-gas monitoring provides real-time readings on a clear LCD display.
- 18-hour battery runtime supports extended shifts, with recharging in under six hours.
- IP68-rated housing provides dust and water protection in demanding working conditions.
- One-button operation and IntelliFlash status indication simplify use and routine inspection.
- ATEX and IECEx certified, with IntelliDox compatibility for automated testing and calibration.

Marking: According to standard
Temperature range: −20°C up to +50°C
Standard: CSA: Class I, Division 1, Groups A, B, C and D
Note: Typical battery runtime: 18 hours. Recharge time: less than 6 hours. Two-year manufacturer's warranty.
Warning: Perform bump tests and calibration according to Honeywell's instructions. Verify sensor operation before use.
