

Plate Lifting Clamp Universal LSP PCUA

Product information

Universal plate lifting clamps are designed for safe lifting and transport of steel plates in vertical and horizontal positions. Durable construction ensures secure grip and reliable performance in industrial applications.

Features:

- All steel body for durable strength in a smaller size
- 180° turning range for easy positioning or transfer of plates
- Lever ensures pre-tensioning and release of grip jaws
- Replacement parts and kits are available
- Individually serialized and tested to 2x WLL. Factory test certification of proof load is included
- Meets: EU Directives: 2006/42/EC and ASME B30.20
