## Permanent Lifting Magnet PML

### Product information

The PML permanent lifting magnet is designed for safe and efficient handling of steel plates, blocks, and round materials. Using a powerful permanent magnetic system, it requires no electricity, ensuring reliable operation and enhanced safety. Its compact and durable construction allows easy handling, while the secure locking mechanism prevents accidental release. Ideal for workshops, warehouses, and industrial lifting applications.

#### Features:

- Use for lifting steel
- Safe and completely autonomous
- Fits on round or flat materials
- Convenient for all kinds of industries
- Ergonomic and robust design
- Maintains charge exclusively by force of permanent magnets without power supply
- Available in different capacities
- Complies with ASME standards
- Minimum maintenance
