# Caldwell Modular Beam Kit Dura-Mod

**Product information**

**CONSULT OUR REPRESENTATIVES FOR MORE TECHNICAL DETAILS**

**DM6-STARTER : in stock**

**Dura-Mod Starter Sets** are pre-assembled modular spreader beam kits for building multiple 2-point spreader beam configurations from one contained system. They are used to match lifting capacity and span requirements while reducing the need for separate fixed-length beams.

**Best used for:**

- Rental houses, crane dealers, and rigging shops.
- Lifts requiring configurable beam spans and capacities from 6 to 250 metric tons.

**Product benefits:**

- Modular sections support multiple capacity and span combinations.
- Knock-down design simplifies transport between job sites.
- Pivoting drop link supports practical rigging alignment.
- Capacity ratings meet ASME B30.20 and BTH-1.
- Supports 1 to 5 spreader sections for custom lengths.

Capacity ratings provided meet ASME B30.20, BTH-1, DESIGN CATEGORY B, CLASS 0.
