

## Caldwell Modular Beam Kit Dura-Mod

### Product information

### CONSULT OUR REPRESENTATIVES FOR MORE TECHNICAL DETAILS

**Dura-Mod Starter Sets** are pre-assembled modular spreader beam kits for building multiple 2-point spreader beam configurations from one contained system. They are used to match lifting capacity and span requirements while reducing the need for separate fixed-length beams.

#### Best used for:

- Rental houses, crane dealers, and rigging shops.
- Lifts requiring configurable beam spans and capacities from 6 to 250 metric tons.

#### Product benefits:

- Modular sections support multiple capacity and span combinations.
- Knock-down design simplifies transport between job sites.
- Pivoting drop link supports practical rigging alignment.
- Capacity ratings meet ASME B30.20 and BTH-1.
- Supports 1 to 5 spreader sections for custom lengths.

Capacity ratings provided meet ASME B30.20, BTH-1, DESIGN CATEGORY B, CLASS 0.
