

Dynamic™ Full Body Harness Hybrid Econo™

Product information

The Dynamic™ Hybrid Econo™ is a lightweight H-style full body harness designed for fall arrest, work positioning, descent and confined-space retrieval applications. Adjustable shoulder straps and grommated leg straps support practical fitting across different users and working requirements.

Best used for:

- Work at height requiring fall arrest and work positioning.
- Confined-space retrieval, evacuation and descent applications.

Product benefits:

- Five D-rings provide attachment options for multiple fall protection applications.
- Adjustable shoulder straps support secure, practical harness fitting.
- Grommated leg straps allow straightforward adjustment and repeatable positioning.
- CSA Class A, P and E certified for defined applications.
- Lightweight construction supports practical use during work at height†
