

Dynamic™ Full Body Harness Dyna-I™

Product information

The Dynamic™ Dyna-I™ is a lightweight H-style full body harness with five adjustment points for fall arrest, work positioning, descent, ladder climbing and confined-space retrieval. Adjustable shoulder and chest straps allow the harness to be positioned for a secure, practical fit during work at height.

Best used for:

- Fall arrest, ladder climbing and elevated work positioning.
- Descent, evacuation and confined-space retrieval applications.

Product benefits:

- Five D-rings provide attachment points for multiple work applications.
- Adjustable shoulder and chest straps support individual harness fitting.
- Polyester webbing resists UV exposure and most chemicals.
- Sub-pelvic strap provides additional support during harness use.
- CSA certified for Class A, L, P and E applications.
