

Honeywell Full Body Harness Miller® H500 Construction Standard

Product information

The Miller H500 Construction Standard is a construction full-body harness for fall arrest and work positioning applications. It combines a back D-ring for fall arrest with side D-rings for positioning, plus five adjustment points and tongue-buckle leg straps for a secure fit.

Best used for:

- General construction work requiring fall arrest protection.
- Elevated work requiring side D-rings for hands-free work positioning.

Product benefits:

- Five adjustment points support a secure, adaptable fit.
 - Steel back D-ring provides a fall arrest connection point.
 - Steel side D-rings accommodate work-positioning lanyards.
 - Tongue-buckle leg straps provide straightforward fit adjustment.
 - OSHA, ANSI and CSA compliant for specified fall-protection applications
- ... [Read more](#)

Material: Polyester webbing; steel D-rings

Warning: Use side D-rings for work positioning only. Follow the manufacturer's instructions and inspect the harness before use.
