Honeywell Full Body Harness Miller® H500 Industry Standard

Product information

The Miller H500 Industry Standard full-body fall arrest harness combines quick upper-body adjustment with secure tongue-buckle leg straps for industrial work at height. Five adjustment points support proper fit, while the back steel D-ring provides the connection point for fall arrest applications.

Best used for:

- Industrial work at height requiring personal fall arrest equipment
- Users needing adjustable fit, straightforward donning and SRL compatibility

Product benefits:

- Flexible webbing follows body contours for comfort and freedom of movement
- Anti-tangle design and Quick-Connect chest buckle simplify donning
- Dedicated SRL web link enables straightforward personal SRL attachment
- Impact indicators and visible stitching support efficient routine inspection
